## Profile

Hi - I'm Elliot. I am 32 years old, born & raised . You may know me from the apocalyptic five/nine hack that crippled our democracy. Yes, that's me- the leader of the (in)famous hacking collective known as fsociety.

Since eviscerating Evil Corp, I've decided to put the hacking stuff behind me. I have since found an unbridled passion for web development, of all things.

JavaScript, React.Js, Node.Js, and MongoDB are my focus now. I just completed a boot camp focused on the MERN stack, and would love to join your team.
